I. Pre-Reading

1. What is fast food? Is it healthy food?
2. Are there fast-food restaurants in your native country? If so, what kinds of food do they serve?

In countries throughout the world, and especially in the United States, hamburgers are a very popular food. It seems impossible, but people have bought more than 99,000,000,000 (99 billion) hamburgers from just one fast-food company. This is enough to make a circle around the earth 12 items!

Most Americans’ favorite place to buy a hamburger is at a fast-food restaurant. In these restaurants, people order their food, wait just a few minutes, and then carry it to their tables themselves. They can eat it in the restaurant or take the food out and eat it at home, at work, in a park, or even in their cars. At many fast-food restaurants people can drive up beside a window. They order their food, and a worker hands it to them through the window.

Hamburgers are not the only kind of food that fast-food restaurants serve. They also serve French fries, milk shakes, soft drinks, and coffee. Some serve fish and chicken. Others serve hot dogs, tacos, pizza, or submarine sandwiches. In the morning, some fast-food restaurants have a complete breakfast menu, with egg sandwiches, pancakes, and juice.

Fast-food restaurants are very popular because the service is fast and the food is inexpensive. For many people, low price are more important than the quality of the food.
These restaurants are also popular because the food is always the same. People know that if they eat at a company's restaurant in the north of the city or in the south of the city, the food will be the same. If they eat in New York or in San Francisco, it will still be the same.

Are hamburgers, French fries, tacos, and other kinds of fast food good for you? In general, fast food has a lot of fat and salt. Today, people know that fatty and salty food is not healthy. Because more people want more food that is good for them, fast-food restaurants are serving salads and other healthy foods.

Restaurants are also cooking with less salt and fat. For example, some restaurants are now using healthier oil for their French fries.

One thing is sure. People will continue to eat fast food. In fact, now there are fast-food restaurants in countries all over the world.
